LAGOTTO ROMAGNOLO

BREED STATISTICS: This interpretation is based on a cross-section of 643 canine patients of the LAGOTTO ROMAGNOLO breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.29 - 0.83) for the breed. The breed average DI is 0.54 (solid square). The patient DI is the solid circle (0.40).

SUMMARY: The degree of laxity (DI = 0.40) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
